LED-Effect

LED-Effect, founded in 2010, is a manufacturer of energy efficient light-emitting diode lighting and is one of the five leaders of Russia in its industry.

LED-Effect

LED-Effect, founded in 2010, is a manufacturer of energy efficient light-emitting diode lighting and is one of the five leaders of Russia in its industry.

The company's high-tech production is aimed at producing modern lighting products, the use of which creates a comfortable lighting environment and saves energy resources.

Products

LED-Effect produces energy-efficient light-emitting diode lamps for use at various facilities: schools, factories, medical institutions, stores, banks, housing and communal services facilities, industrial facilities, gas stations, airports, railway stations, bus stations, stadiums, gyms, restaurants and cafes, as well as in the quality of architectural lighting.

Since recently, the company's factory has been partially reoriented to produce light-emitting diode lighting fixtures with built-in ultraviolet recirculators and classic models of ultraviolet recirculators.

Products manufactured by the company are regularly tested in accredited laboratories and meet the most stringent modern requirements for lighting devices.

In addition to light-emitting diode luminaires, LED-Effect implements systems of automated lighting control, which can save up to 90% of electricity in lighting.

Smart lighting

One of the main directions of LED-Effect company in the near future - energy service projects with widespread use of smart lighting in cities. Such an urban environment, according to the company's management, will make people's lives truly comfortable without loss of energy.
