Balancing Machine Plant RDC

Balancing Machine Plant RDC is a leading Russian manufacturer in the design, development, supply and implementation of balancing machines and vibration measuring equipment for enterprises in various industries. The company provides the most complete range of products and services in this area: economic justification of implementation of diagnostic and balancing systems, development of technical specifications, installation of equipment, its adjustment, technical support, warranty repair, modernization, training of service personnel. At the same time, the plant carries out modernization and service maintenance of both balancing machines of its own production and all balancing machines of third-party manufacturers.

Balancing Machine Plant RDC

Balancing Machine Plant RDC is a leading Russian manufacturer in the design, development, supply and implementation of balancing machines and vibration measuring equipment for enterprises in various industries. The company provides the most complete range of products and services in this area: economic justification of implementation of diagnostic and balancing systems, development of technical specifications, installation of equipment, its adjustment, technical support, warranty repair, modernization, training of service personnel. At the same time, the plant carries out modernization and service maintenance of both balancing machines of its own production and all balancing machines of third-party manufacturers.

Qualified specialists of the company are engaged in vibrating and balancing a wide variety of rotary equipment, creating new methods and diagnostic approaches. At the same time, on the basis of Balancing Machine Plant RDC created a training center that provides training and accreditation of specialists under approved programs. Today Balancing Machine Plant RDC is a well-balanced and dynamically developing company with creative potential, capable of solving the most complex technical problems in the field of vibration diagnostics.

Balancing Machine Plant RDC is a member of the International Association of Aero-Engine Manufacturers and the Russian Association Of Manufacturers Of Machine Tools Stankoinstrument.

Competitive advantages

Efficient operation of the maintenance and repair system of any enterprise requires the use of modern equipment for monitoring and vibration diagnostics of machines and mechanisms. Poorly balanced rotor is a source of increased vibration, which in turn leads to premature bearing wear and equipment failure, so the production of rotor machines, repair of the enterprise equipment is impossible without the use of balancing machines.

More than

**25 year-old
period**

**successful
introduction**

For more than 25-year-old period of successful introduction of the balancing equipment at the various enterprises, experts of Balancing Machine Plant RDC have saved up the richest technological and methodological experience. High quality of balancing machines and a wide range of special equipment allow to solve practically any task of rotor balancing. Application of multichannel vibrodiagnostic test complexes on the basis of measuring units allows to solve complex tasks of vibro adjustment of simple and complex rotor machines both on bench complexes and on site.

Awards

In 2004, Igor Radchik (General Director of Balancing Machine Plant RDC) and Konstantin Konstantinovich Yakutin (Technical Director of the Company) became the laureates of the Russian Federation Government Prize in the field of science and technology for the development, production and implementation of new generation balancing machines.

Geography of supplies

Balancing Machine Plant RDC delivers products throughout Russia, as well as to the Commonwealth of Independent States countries, the Baltic States, Central America, Asia. Among the customers are all branches of industry in which the rotor equipment is operated (power engineering, oil and gas, metallurgical, chemical, metalworking, transport, defense industry, etc.).

It should be noted that in working with customers, Balancing Machine Plant RDC is distinguished by an individual approach to each customer and high professionalism of employees.

1. Balancing Machine Plant RDC is a leading Russian manufacturer in the design, development, supply and implementation of balancing

4 facts:

machines and vibration measuring equipment for enterprises in various industries.

2. It supplies products throughout Russia, as well as to the Commonwealth of Independent States countries, the Baltic States, Central America, Asia.

3. Balancing Machine Plant RDC has been on the market for over 25 years.

4. The company's customers include all industries in which rotary equipment is operated.
