Gelena Himavto

The group of companies Gelena Himavto more than 20 years of activity in the field of development and production of cooling and glass washing liquids, as well as coolants, is a recognized leader in the Russian market, both in terms of quality of products and sales volumes.

Группа компаний «ХИМАВТО» более 20 лет осуществляет свою деятельность в области разработки и производства охлаждающих и стеклоомывающих жидкостей, а также теплоносителей, являясь признанным лидером на российском рынке как по качеству производимой продукции, так и по объемам продаж.

The company is certified according to the quality management standard ISO 9001:2015, which guarantees high standards of work at all stages of activity. The company has at its disposal a certified laboratory, which is also a direct proof of high production standards and confirms the quality of the product range. In addition, the company's compliance with the strictest requirements and standards has been repeatedly confirmed by independent examinations, the results of which were published in the magazines ZA RULEM and

AUTOREVIEW, as well as in specialized construction publications.

Products

Packaged products under the brand names Tosol-Sever and antifreeze NORD, innovative glass washing liquids produced by the company Gelena Himavto can be found in almost any store for cars and networks of gas stations throughout Russia.

Production facilities of the company allow to produce and ship

**500
tons**

of packaged
products
per day

Production

The whole technological scheme of production is built on the basis of flexible response to changes in the structure of consumption of finished products and allows to produce simultaneously several different variants of packaged products and promptly change the range.

An impressive fleet of storage facilities, automated filling and packaging lines and a unique computer-controlled warehouse complex guarantee uninterrupted and round-the-clock shipment of products even during seasonal peak consumption by motor vehicles, universal containers, railway cars and tanks.

Products made of polymers of almost any complexity and design are manufactured on the equipment of companies Kautex, ENGEL, ARBURG - world leaders in the field of blow molding and injection molding.

In addition, the company Gelena Himavto offers full service for the production of private brands in various fields:

- innovative glass washing liquids;
- classic glass washing liquids;
- antifreeze agents;
- coolants;
- polyethylene containers and polyethylene terephthalate products;
- plastic products made by injection molding.

In addition to ready-made solutions, Gelena Himavto also offers its customers a service for the development and manufacture of products according to individual company requirements. For this purpose, the company cooperates with professional design and engineering enterprises. The new products will not only be of high quality and completed on time, but will also stand out among the products on the market.
