# Mojo Cacao

The company Mojo Cacao, which appeared on the market in 2016, today is one of the most popular brands of healthy chocolate in Russia.

The company's founder Yevgeniya Tsyrlin started her business with a simple passion for healthy food - she decided to create it herself without finding a suitable alternative to ordinary chocolate. The idea of the brand is to combine in the finished product a useful component, taste and aesthetics.

## Production and certification

At the beginning of her journey to create harmless and delicious chocolate, Yevgeniya Tsyrlin managed to work with chef Ivan Dubkov, who was also a specialist in vegetarian food. Together they developed sweets from nuts, dried fruits and chocolate. But eventually, it became clear that there is no such chocolate, which does not include soya lecithin. This fact contradicted the concept of healthy food, so Yevgeniya decided to produce chocolate herself.

The development of an ideal recipe began, which tastes and is similar to the usual chocolate in taste and consistency, but does not contain refined sugar, milk and various preservatives. After many improvements, Yevgeniya managed to achieve the desired results. The next stage was the expansion of the product line, the main breakthrough in which was the production of milk chocolate without adding milk. The secret of success was the accurate calculation of proportions and many experiments with coconut and cashew flour.

## The task of the finished product

To present to the audience chocolate that everyone can eat, so it does not contain products of animal origin, gluten and genetically modified organisms. The organization keeps the information on chocolate composition checks in the public domain, so that everyone can see it for himself.
