AgroChimInvest

AgroChimInvest is one of the leading Russian companies producing highly effective chemical plant protection products for agricultural production. The company specializes in growing, processing, cleaning and exporting such agricultural products as coriander, flax, mustard, chickpea, lentils, millet.

The company started its activity in 2003 with the production of highly effective chemical plant protection products for agricultural production. During 17 years of work in the market of agrochemical services more than 40 trademarks have been registered, technologies of production and application of each preparation have been worked out, own complex systems of crop protection have been created, numerous experiments have been conducted on fields all over Russia in different climatic zones. The company's leading agronomists annually conduct full control and constant consultations on all stages of treatment with crop protection agents.

Export

All the company's products undergo laboratory testing and certification to continuously monitor and confirm the high quality of each crop. All goods are delivered by own transport to the terminal and shipped to customers on the Commonwealth of Independent States and free on boards terms from ports of Novorossiysk and Far East.

At the same time, on a regular basis AgroChimInvest supplies its own products to such countries as Sri Lanka, Indonesia, Jordan, Turkey, Nepal, Yemen, Algeria, Thailand, Egypt, Somalia, UAE, South Africa, Malaysia, Vietnam, India, Chile, Israel, Pakistan, Bangladesh, Saudi Arabia and others.

The export direction of the company was opened

in 2015

AgroChemInvest actively cooperates with such large organizations as

Sberbank and Raiffeisenbank, which provide financial services for production processes. In addition, our regular partners are the leading agricultural companies in Russia: Miratorg Agribusiness Holding, Belgrankorm-holding, Sucden Group, Agricultural Holding Kanevskoy.

Forestry

In addition, since 2015 the company has also been actively developing its timber processing business. At present, a full cycle timber processing complex has been formed and launched in Smolensk region. The specialists of the company have mastered the

The end products - lumbers (boards, bars), pallets, pellets and fuel briquettes RUF - are made of ecologically clean materials: coniferous and deciduous trees. In addition, all collected pallets undergo mandatory phytosanitary processing stages and subsequent

processing

technology of highly efficient logging and woodworking non-waste production. The company has its own raw material base, a wide park of logging equipment, modern lines for processing lumber and production of pallets and fuel pellets, heated storage facilities.

IPPC labeling. Such measures allow the company to be a permanent supplier of its own goods for the leading European manufacturer EGGER Drevproduct. In the future AgroChimInvest can also establish the output of these goods on the export market.

Plans

Today, AgroChemInvest plans to further develop all three areas of the company, to organize its own conferences for employees and partners, to participate in various marketing activities. The company is an annual exhibitor of the largest agricultural exhibition YugAgro, as well as a participant in the international food industry exhibition Gulfood in the United Arab Emirates.
