Parus Electro

The company Parus Electro, founded in 2011, is a leading domestic developer and manufacturer of converting equipment: uninterruptible power supplies of alternating and direct current, solar inverters, electric charging stations, etc.

Parus Electro

The company Parus Electro, founded in 2011, is a leading domestic developer and manufacturer of converting equipment: uninterruptible power supplies of alternating and direct current, solar inverters, electric charging stations, etc.

Its own design bureau consisting of more than 20 people allows the company to provide the whole cycle of work: from development of new models to the production of finished products. In this case, the company's specialists independently develop and produce all the necessary solutions for the project, including those designed to meet the special requirements of customers. Production and assembly are carried out at the full cycle plant in Moscow, as well as at the company's own production site in Leninsky district of Moscow region. This approach ensures shorter manufacturing times and optimisation of production costs, as well as compliance with legal requirements for import substitution. All production facilities used by Parus Electro are built according to the three-stage quality control system according to ISO 9001 standart. The company's products are not inferior to the world's leading brands in terms of technical and quality characteristics, while being more profitable in terms of cost and having a shorter production period.

Production

Parus Electro

Product

The activity profile of Parus Electro is to develop and produce the following products:

- Uninterruptible power supplies of alternating and direct current;
- Network solar inverters;
- Electric charging stations for electric transport;
- 19-inch telecommunication cabinets;
- Energy-saving light-emitting diode lighting;
- Container infrastructure solutions.

Against the background of competitors, Parus Electro products have a number of advantages:

- Domestic manufacturer of converting equipment;
- Series production of full cycle with three-level quality control according to ISO 9001 standart;
- Own design documentation and developer staff;
- Full cycle of works from development to production and delivery of products;
- Support and service throughout the entire product life cycle;
- 22 service centers in all major Russian cities;
- 15 regional representatives to support customers and partners in the field.

Profit

Work in the domestic market

During the successful work since 2011 Parus Electro has managed to strengthen its positions in the domestic market - it is one of the five leaders in its sector in Russia, holds 5-10% market share.

For example, for three consecutive years Parus Electro provides uninterrupted operation of the whole complex of equipment and workplaces involved in the Direct Line with the President of the Russian Federation.

Parus Electro is among the

top-5 companies

in its sector in Russia
