TECHNOPLAST

Engineering and Production Company TECHNOPLAST, founded in 2012, produces roof ventilation and canopies.

TECHNOPLAST

Engineering and Production Company
TECHNOPLAST, founded in 2012, produces roof
ventilation and canopies.

At the moment the company is one of the leaders of the Russian
market - ventilation elements Krovent that are known to consumers in
all regions of Russia, as well as in The Commonwealth of Independent
States and Europe. Initially, the author of the idea was Vadim Smirnov,
who to this day is the CEO of the company and a part-time chief author
of the entire line of products.

The company has its own park of casting machines and

48
moulds

Products

In the assortment of the company
TECHNOPLAST there are not only
Krovent elements for pitched roof
ventilation, as well as aerators for
the device ventilation of flat roofs,

All products are made of impact-
resistant plastic that is resistant to
ultraviolet rays and temperature
fluctuations. In production, dyes
are used at least 7 levels of fading.

High quality products - one of the
company's priorities. The latest
developments and materials used
to create all goods, constant
quality control of raw materials

canopies, ventilation grilles for the attic and grilles for the basement.

In 2019, laboratory tests of Krovent ventilation elements were carried out at the Technical and Test Institute for Construction Praha, which is confirmed by the European Test Certificate. The manufacturer also provides the Russian certificate of conformity and safety data sheets.

Weight of ventilation elements is quite small and therefore in the transportation of products allowed to store them on top of the roofing materials. Thus, trading companies save significant amounts on transportation costs, because the cost of delivery of ventilation elements Krovent in this mode of transportation is almost zero.

and finished products allows you to provide a multi-year warranty from the manufacturer.

Due to the constant expansion of the product range, the company management pays special attention to prospective fields and designs. Some products have no analogues in the world, which is confirmed by patents for invention.

Export

In 2016, the first batch of Krovent ventilation elements were sold for export to the Commonwealth of Independent States countries. In the same year, the products of the brand Krovent first entered the European market. Since then, exports have been made on a regular basis. However, elements of roof ventilation Krovent are exported to foreign markets not only TECHNOPLAST, but also Russian partners of the company, which also have a positive reputation with European partners.

The first European partner was the Maikon company, cooperation with which continues today. The guarantee of long-term relations was the constant quality of products, attractive price conditions, as well as production and delivery time. In comparison with competitors, working on prepayment, TECHNOPLAST company provides permanent partners with a delay of payment.

Constant expansion of the geography of ventilation elements supplies Krovent demonstrates compliance of product quality with all international standards and gives an incentive to the company's staff to continuously improve production methods, study and implement the best international practices. TECHNOPLAST company is interested in finding new foreign partners and is ready to expand its product line to meet the needs of each market segment.

TECHNOPLAST products

Innovative development

TECHNOPLAST's management adheres to the company's innovative development strategy. Today's time is a time of technology and competence, so within a single strategy, the company is constantly engaged in updating and modernization of production lines, process equipment, improving every step of the technological process and technologies as a whole.

At the same time, we continue to master the methods and tools of lean production in order to promote products in the most rational ways. In the conditions of global competition, these very criteria, not only quality and price parameters, become the basis for development and prosperity. Development of TECHNOPLAST company goes mainly at the expense of own funds, which are earned to expand production and

All this makes it possible to influence the production cycle, to manufacture products under the customer's brand, to change the set at the customer's request, to significantly reduce production time, as well as to receive any technical information in a short time. TECHNOPLAST has sufficient production capacity to meet the demand not only in the domestic but also in foreign markets.

modernize it.
