HEM

HEM is the first Russian company in the market of products for laboratory medicine of different profiles.

HEM

HEM is the first Russian company in the market of products for laboratory medicine of different profiles.

The company was founded in 1988 on the basis of hematological scientific center, and now it is one of the oldest private companies in the industry.

About company

In 2013, the company initiated the creation of the Ready-to-Use Culture Media Center, which is the first Russian production of ready-to-use nutrient media in Petri dishes that meet Russian and international standards. Production of media based on the Russian production site allows you to produce high-quality and inexpensive products available to each domestic laboratory. HEM company is also successfully developing competence in the field of expertise and audit of microbiological laboratory.

Constant innovations and application of modern approaches to the production of laboratory diagnostics products have confirmed the position of HEM company as a leader of this market segment. Currently, the company has formed three priority areas: microbiology, parasitology and express diagnostics.

HEM company regularly receives awards for its work, becomes a winner of numerous national competitions. For example, the company is the winner of the All-Russian competition 1000 best enterprises and organizations of Russia XXI century of different years; the winner of the competition Moscow Entrepreneur - 2009 in the nomination Production of medicines, products and equipment for medical purposes; the company has a medal Best supplier of public procurement - 2015; diploma Best supplier of medical products All-Russian competition GOSZAKAZ – For Transparent Public Procurement; HEM is included in the Federal Register of honest suppliers.
